MATHEMATICS (COURSE 18)

Bachelor of Science in Mathematics
(Applied Mathematics Option)

General Institute Requirements (GIRs)

The General Institute Requirements include a Communication Requirement that is integrated into both the HASS Requirement and the requirements of each major; see details below.

Summary of Subject Requirements	Subjects
Science Requirement	6
Humanities, Arts, and Social Sciences (HASS) Requirement; at least two of these subjects must be designated as communication-intensive (CI-H) to fulfill the Communication Requirement.	8
Restricted Electives in Science and Technology (REST) Requirement [one subject can be satisfied by 18.03 in the Departmental Program]	2
Laboratory Requirement (12 units)	1
Total GIR Subjects Required for SB Degree	**17**

Physical Education Requirement

Swimming requirement, plus four physical education courses for eight points.

Departmental Program

Choose at least two subjects in the major that are designated as communication-intensive (CI-M) to fulfill the Communication Requirement.

Required Subjects		Units
18.03	Differential Equations [1]	12
18.04	Complex Variables with Applications	12
or 18.112	Functions of a Complex Variable	
18.06	Linear Algebra [2]	12
18.300	Principles of Continuum Applied Mathematics	12
Select one of the following:		12-15
18.200	Principles of Discrete Applied Mathematics (15 units, CI-M)	
18.200A	Principles of Discrete Applied Mathematics (12 units)	

Restricted Electives

Select four additional 12-unit Course 18 subjects from the following two groups with at least one subject from each group: [3]	48

Group I—Probability and statistics, combinatorics, computer science

Group II—Numerical analysis, physical mathematics, nonlinear dynamics

Units in Major	108-111
Unrestricted Electives	81-84
Units in Major That Also Satisfy the GIRs	(12)
Total Units Beyond the GIRs Required for SB Degree	**180**

The units for any subject that counts as one of the 17 GIR subjects cannot also be counted as units required beyond the GIRs.

[1] *Students may substitute one of the more advanced subjects 18.152 Introduction to Partial Differential Equations or 18.303 Linear Partial Differential Equations: Analysis and Numerics for 18.03. 18.032 Differential Equations, which places more emphasis on theory, is also an acceptable option.*

[2] *Students may substitute 18.C06[J] Linear Algebra and Optimization, 18.700 Linear Algebra (which places more emphasis on theory and proofs), or the more advanced subject, 18.701 Algebra I.*

[3] *A list of acceptable subjects (https://math.mit.edu/academics/undergrad/major/course18/applied.php) is available from Math Academic Services and on the department's website.*

Communication-Intensive Subjects in the Major

To satisfy the requirement that students take two CI-M subjects, students must select one of the following options:

Option A	
Select two of the following:	
18.104	Seminar in Analysis
18.204	Undergraduate Seminar in Discrete Mathematics
18.384	Undergraduate Seminar in Physical Mathematics
18.424	Seminar in Information Theory
18.434	Seminar in Theoretical Computer Science
18.504	Seminar in Logic
18.704	Seminar in Algebra
18.784	Seminar in Number Theory
18.821	Project Laboratory in Mathematics
18.904	Seminar in Topology
18.994	Seminar in Geometry
Option B	
Select one subject from Option A and one of the following:	
8.06	Quantum Physics III
14.18	Mathematical Economic Modeling
14.33	Research and Communication in Economics: Topics, Methods, and Implementation
18.100P	Real Analysis

| 18.100Q | Real Analysis |
| 18.200 | Principles of Discrete Applied Mathematics |
