SOCIOTECHNICAL SYSTEMS RESEARCH CENTER

The Sociotechnical Systems Research Center (SSRC) (*http://ssrc.mit.edu*) is an interdisciplinary research center at MIT that focuses on the high-impact, complex, sociotechnical systems that shape our world.

SSRC brings together faculty, researchers, students, and staff from across MIT to study and seek solutions to complex systems challenges that span healthcare, energy, infrastructure networks, the environment, and international development.

SSRC research partners include:

- Center for Biomedical Innovation (CBI) (*http://cbi.mit.edu*)
- Center for Complex Engineering Systems (CCES) (*http://ssrc.mit.edu/programs/center-complex-engineering-systems-cces*)
- Connection Science (*http://connection.mit.edu*)
- Systems Engineering Advancement Research Initiative (SEAri) (*http://seari.mit.edu*)

Send an email (*ssrcinfo@mit.edu*) for more information.
